

Psychiatry and Neuroscience Seminar Series 2025

Date	Speaker (host)	From	Proposed Title
10 January	Pr Giuseppe GANGAROSSA (H Rebholz)	BFA, CNRS UMR 8251, Paris, France	Putting the dopaminoceptive thalamus in the big picture of feeding and energy balance
7 February	Dr Fabrice De Chaumont (G Le Pen/O Krebs)	Institut Pasteur, Paris, France	Practical use of Live Mouse Tracker combined with blocks : experiment design to data extraction
7 March	Dr Mario CARTA (B Pardi)	Bordeaux Neurocampus, Bordeaux, France	Cellular and circuit mechanisms underlying sensory processing in the insular cortex
4 April	Dr Varun VENKATARAMANI (G Huberfeld)	Heidelberg University, Heidelberg, Germany	The cancer neuroscience of multicellular brain tumor networks
2 May	? (?)	?	??
6 June	Pr Huib MANSVELDER (F Koukouli)	Vrije Universiteit Amsterdam, Netherlands	Cortical neuronal diversity supporting human cognition
4 July	? (?)	?	?
5 September	Dr Dragomir MILOVANOVIC (T Galli)	Dynamics of spinal cord networks during behaviour	The networks that make us move: voltage imaging in the zebrafish spinal cord
3 October	? (?)	?	?
7 November	Pr Thomas PREAT (C Hanus/Z Lenkei)	Brain plasticity unit, ESPCI, France	Astrocyte-to-neuron H2O2 signaling in drosophila long-term memory: a potential link to Alzheimer's disease etiology
5 December	Dr Morgane THION (R Santos/D Zala)	Collège de France, France	soon

Seminars are @ noon, mainly on Friday

INSERM U1266, Institute of Psychiatry and Neuroscience of Paris, 102-108 rue de la santé - 75014 Paris

Room Deborah LEVY R04-45
